Forecast for Monday 01 Jul 2024

Weather: Cloudy with rain, heavy for a time in the morning and feeling chilly at height under persistent low cloud. Clearing to sunny spells in the afternoon and evening. Strengthening northwesterly winds.

Chance of cloud-free hill tops above 700m: 20% or less at first, rising to 80% through the afternoon.

Low cloud and visibility: Some broken cloud around 500-700m at first, becoming more extensive for a time with poor visibilities in persistent rain. This then lifting through the afternoon to leave mainly clear summits and just some patches of broken cloud around 800-900m or higher.

Meteorologist's View

Feeling unseasonably cold under persistent low cloud in the morning. Improving conditions in the afternoon, though strengthening winds will make for fairly arduous walking on exposed terrain with buffeting of clothing. Balance may be affected at times

Forecast for Tuesday 02 Jul 2024

Weather: Some early dry and bright weather, but soon clouding over with showers through the middle of the day. Becoming drier and brighter again in the evening. Remaining unseasonably cold.

Maximum wind: West to Northwest 20-25mph, gust 30-35mph

Chance of cloud-free hill tops above 700m: 70% first thing, soon falling to 50% through the day, rising again to 80% by the evening.

Low cloud and visibility: Mainly clear summits up to daw, but cloud building from the west through the day, falling to 500-700m at times and visibilities falling moderate or poor as showers pass by. Conditions improving again through the afternoon and evening.

Temperature: **Valleys:** Plus 9 rising to plus 16 Celsius
At 700m: Plus 5 rising to plus 9 Celsius
Freezing level: Above summits
